

# 3D Shaker

3DS20

## Features

3DS20 is a 3-dimensional small shaker for the small sample mixing. It is an ideal choice for protein imprinting, coloring and other operations. The inclination angle of the tray is large enough to ensure that the reagent can be fully dispersed uniformly.

- Suitable for mixing serum tube and centrifugal tube
- Small vibration, no noise and ultra-quiet
- Swing trajectory and fixed speed
- Suitable for the refrigerator
- Very thorough, mild blending operation without foaming
- Rubber tray can accommodate 60 x 1.5ml, or 30 x 3ml, or 21 x 7ml, or 17 x 15ml
- Angle of the tray is large enough to ensure that the reagents are well dispersed

## Specifications

Speed	20rpm
Operation Mode	3D in 20°
Max. Loading Capacity	0.8Kg
Power	20W
Voltage	AC100~120V / AC200~240V; 50~60Hz
Weight	1.7Kg
Dimension (mm)	240(W) x 170(D) x 150(H)
