

Micro Centrifuge

MC10V

Features

MC10V is a smart and versatile micro centrifuge; equipped with two centrifugal rotors and multiple tube adapters. It can be suspend operation with opened cover and start to run with closed cover at the original time

- The rotors with 8 holes, the RCF is more higher
- The cover automatically opens for easy one-handed operation
- Unique rotor snaps for easy replacement
- LCD display, temperature and time countdown display
- Maintenance-free motor with ultra-low noise, durable and safe
- Multi-purpose machine for a variety of experiments, exquisite and compact

Specifications

Speed	3000 ~ 10000rpm
RCF	500 ~ 5400xg
Noise	≤55dB
Timer	1s ~ 99m59s
Rotor Capacity	8 x 0.2/0.5/1.5/2.0ml for MCTs & 2 x 8 well for PCR Strips
Voltage	AC100~120V / AC200~240V; 50~60Hz
Dimension (mm)	160(W) x 176(D) x 121(H)
