

Micro Centrifuge

MC15V

Features

MC15V is a low-noise miniature high speed micro centrifuge, with soft braking function. It can effectively prevent sample suspension and protect sensitive samples.

- Maintenance-free motor with ultra-low noise, durable and safe
- Only 13s to reach the highest/lowest speed
- Press “Short” for transient centrifugation
- Aluminum alloy rotor can be autoclaved
- Unique air duct to ensure the temperature of the sample
- Electronic locks ensure safety
- Automatic detection of unbalanced systems

Specifications

Speed	500 ~ 15000rpm (In increments of 100rpm)
RCF	100 ~ 15000xg (In increments of 100xg)
Noise	≤60dB
Timer	0 ~ 99m59s
Speed Time (Fast)	≤15sec.
Speed Time (Slow)	45sec. ±5sec.
Rotor Capacity	12 x 1.5/2.0ml
Max. Sample Density	1.2g/ml
Power	100W
Voltage	AC100~120V / AC200~240V; 50~60Hz
Dimension (mm)	230(W) x 270(D) x 155(H)
