

UV Transilluminator

Code: UVT-C1

Features

UVT-C1 is a single wave length UV Transilluminator with 50ng sensitivity for academic labs

- Quartz filters that pass fixed UV wavelength and no visible light to give a perfect observation
- Special polymer transparent safety cover that protects the user from UV emissions
- The enclosure is epoxy coated MS body with chemical resistant stainless steel top
- Electronic high frequency ballast to give instant start and no humming
- Low heat generation and fan cooled interior
- High intensity durable UV tubes

Specifications

Wave Length	365nm
Filter Area	20 x 20 cm
Sensitivity	50ng
No. of Tubes	6 UV Tubes
Tube Wattage	8 Watts
Voltage	200 - 260 AC/50Hz
Dimensions (mm)	350 x 300 x 150 (mm)
